## SUMMARY

Full Stack Developer with over 13 years of experience building critical systems in healthcare, business management, and commerce. Specialized in PHP/Symfony, Laravel, and Elixir/Phoenix, with domain knowledge of Docker, MySQL, and cloud platforms (GCP, AWS). I have developed medical care platforms with digital signature integration and cloud storage, as well as business management, inventory, and contract systems. I apply AI tools (Claude Code, Gemini CLI) in the daily workflow to accelerate delivery times and improve code quality.

## EXPERIENCE

**RECEMED** · Full Stack Developer & Integrations Lead — Oct 2021 - Present | Santiago, Chile

- Developed critical modules for a digital health platform, including user management, care workflows, and differentiated portals by actor type.
- Developed integrations with certified electronic signature providers for the legal validation of digital documents, complying with current regulations in Chile.
- Developed integrations with multiple GCP services including storage, real-time notifications, and log and instance management, to support critical system workflows.
- Designed and maintained microservices and REST APIs with PHP, Symfony, and Laravel, deployed with Docker and Apache.
- Developed in Elixir/Phoenix a medication maintenance module and integration with the Banmedica REST API to check medication availability.
- Automated processes through cron commands and integrated external platforms via Slack SDK for internal system notifications.
- Managed version control with Bitbucket and task tracking with Jira in an agile workflow.
- Created unit test suites with Python 3 and unittest; incorporated AI tools (Claude Code, Gemini CLI) to optimize the development workflow.

**PlanOK Chile** · Operations Analyst — Mar 2021 - Sep 2021 | Santiago, Chile

- Administered and optimized MySQL databases for a real estate management platform with multiple operating modules.
- Developed and maintained web application features with PHP, JavaScript, jQuery, HTML5, and CSS.

**Frontec Agencia Digital** · Software Developer & Tech Lead — Apr 2019 - Feb 2021 | Santiago, Chile

- Developed contract and inventory management modules for multi-user enterprise software built with Symfony and MySQL.
- Implemented new functionalities in an existing clinical system, including holiday integration and clinical history module for doctors and patients.
- Led the technical team, defining architecture standards and coordinating deliveries between projects.

**EcoprintQ Chile** · Software Developer — Mar 2018 - Jan 2019 | Santiago, Chile

- Implemented OAuth authentication (SSO) integration for the enterprise printing management platform.
- Developed backend web applications with PHP, Node.js, Laravel, and Express, and a cross-platform desktop application with ElectronJS.

**iKIMUN LLC** · Remote Front-End Developer — Oct 2017 - Jan 2018 | Remote

- Developed administrative area modules for an attendance management system, using AngularJS integrated with RESTful APIs on a Laravel/Node.js stack.

**CBB Corporation Cilfer C.A.** · Web Developer — Feb 2016 - May 2017 | Caracas, Venezuela

- Developed a real-time event and transaction management platform with PHP, JavaScript, MySQL, and jQuery.
- Built a real estate inventory and sales management system with reporting and stock control modules.

**SUPPORTVIPTECHCENTER C.A.** · Web Developer — Sep 2014 - Dec 2015 | Maturín, Venezuela

- Developed web applications under the MVC pattern with PHP, JavaScript, C#, AngularJS, jQuery, and Bootstrap for enterprise sector clients.

## EDUCATION

✓ **Systems Engineer** in Computer Software Engineering | **Instituto Universitario Politécnico Santiago Mariño** | Apr 2008 - Nov 2013

## COURSES & CERTIFICATIONS

✓ Java Backend Developer Bootcamp | **ATL Academy**

✓ Introduction to Elixir Course | **Platzi**

✓ React.js Course | **Platzi**

## SKILLS

**Backend:** PHP, Symfony, Laravel, Elixir/Phoenix, Python, Node.js/ Express, Java/Spring Boot

**Frontend:** React, JavaScript, jQuery, HTML5, CSS3, Twig, Blade

**Databases:** MySQL, PostgreSQL, Doctrine, Eloquent, Ecto, Hibernate, JPA

**DevOps & Cloud:** Docker, Git, Bitbucket, Jira, GCP (Storage, Pub/Sub, Logging, Compute), AWS, Apache

**Integrations & Testing:** Firma electrónica certificada, Slack SDK, OAuth SSO, Python/unittest, PHPUnit

**Architecture & Patterns:** SOLID, MVC, Inyección de dependencias, Repository Pattern, Component-Based (React), Observer/Pub-Sub

## SELECTED PROJECTS

✓ **Inventory Management System:** Multi-currency POS system (USD, VES, EUR) with multi-location stock control and QR/EAN13 generation. Built with Symfony, MySQL, and Docker.

✓ **Personal Portfolio & Blog:** Bilingual portfolio (ES/EN) with dark mode, interactive stack filter, and technical blog. Built with React, Tailwind CSS, Vite, and deployed with GitHub Actions.
